

# MAZURY GOLF & COUNTRY CLUB

Championship golf course (par 72). The project field was made by one of the oldest companies in the world for golf course architecture - Hawtree Ltd. in Great Britain with Martin Hawtree at the helm. The company was established in 1912 and since then designs, builds and modernizes golf courses. Today Hawtree Golf Course Architects, has about 750 projects on their account. And the project for the golf course Mazury Golf & Country Club was the first work of Hawtree Ltd., in this part of Europe.

The basic idea was to use the designer's extraordinary beauty of Warmia landscape without undue interference in nature. The variety of terrain of the golf course Mazury Golf & Country Club, and its unusual location of the property is very interesting for the players - both experienced and beginners. The field is perfectly adapted to the level and sophistication of players. Thanks to numerous natural and artificial barriers, the golf course Naterki is one of the most interesting, but also most difficult locations in Poland.
